How to download and install prebuilt OpenJDK packages

JDK 9 & Later

Oracle's OpenJDK JDK binaries for Windows, macOS, and Linux are available on release-specific pages of jdk.java.net as .tar.gz or .zip archives.

As an example, the archives for JDK 13 may be found on jdk.java.net/13 and may be extracted on the command line using

```
$ tar xvf openjdk-13*_bin.tar.gz
```

or

```
$ unzip openjdk-13*_bin.zip
```

depending on the archive type.

JDK 8

Debian, Ubuntu, etc.

On the command line, type:

```
$ sudo apt-get install openjdk-8-jre
```

The openjdk-8-jre package contains just the Java Runtime Environment. If you want to develop Java programs then please install the openjdk-8-jdk package.
