COMP 3095 – Web Application Development with Java

Lab 2B
Task Management

Table of Contents

Laboratory #2 – Task Management
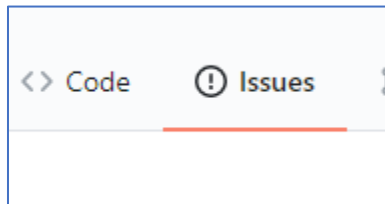

1. **Laboratory Objective**

   The goal of this lab is to initialize GitHub to setup task for our COMP3095 – Lab Project.

2. **Laboratory Learning Outcomes:** After conducting this laboratory students will be able to:
   a. Create tasks in GitHub
   b. Create issues and assocaite with task, source code changes.
   c. Project scheduling and organization

3. **Laboratory Instructions**

   a. Navigate to the **issue** screen.

   b. Create some new Issues to map out of upcoming work for the course. This is **not** the complete task list, but is sufficient for now and will serve us well for the upcoming lectures.
